

AI IN FINANCE CERTIFICATE

Program Description

This live faculty-led program meets weekly on Monday, Wednesday, and Friday from 7PM to 9PM ET. The AI in Finance certificate prepares professionals to confidently apply AI technologies in the financial industry, connecting new tools to practical impact in their work. Taught by Cornell faculty and industry practitioners with expertise in engineering and business, the program is designed as a step-by-step progression that moves from foundational knowledge to applications, responsible AI practices, and strategic leadership. It concludes with a week-long leadership series that integrates insights from across the modules, enabling professionals to assess organizational readiness, identify opportunities, and design practical roadmaps for AI adoption.

Key Takeaways

- Demonstrate fluency in AI concepts, tools, and data to understand how classical and generative AI are applied across financial contexts
- Critically evaluate and apply the breadth of AI applications across the financial landscape, correctly applying governance and risk mitigation frameworks
- Drive strategic and pragmatic approaches to AI adoption, leading both technical and organizational change to create long-term value in your organization

What You'll Earn

- AI in Finance Certificate from Cornell Duffield College of Engineering and Cornell SC Johnson College of Business
- 75 Professional Development Hours (7.5 CEUs)
- Clock Hours: 70
