

BUSINESS ETHICS CERTIFICATE

Program Description

Exploring your personal take on the ethics of business and fostering standards for your organization can improve decision making, fortify team culture, and enable you to avoid potential issues and dysfunctions in various business settings.

This certificate program will give you the tools to apply the ethics of business to your organization. Throughout the program, you will break down the role ethics play in society and decision making. By using ethical reasoning, you will be able to anticipate issues that arise in business settings and create plans for avoiding them. You will then determine how to recognize psychological factors in yourself and others that interfere with making good ethical decisions and apply strategies to mitigate them.

The program will culminate in the discussion of research-based blockers that negatively affect work culture ethics at the personal and organizational levels. You will examine responsive strategies for the most common social and organizational factors that exacerbate the human tendency to overlook or misapply ethical analysis. By the end of the program, you'll be prepared to foster the development of a responsible organizational culture and address potential legal and ethical issues, supporting your team in today's complex and ever-changing business landscape.

For the best experience in this program it is recommended to take these courses in the order that they appear.
