

HEALTHCARE MANAGEMENT CERTIFICATE

Program Description

Healthcare isn't limited to patient care. Today's most successful healthcare professionals are also well versed in essential business and management concepts. Whether you're running your own practice or managing others in a clinic, department or nursing floor, you must be able to effectively lead the people around you, understand the financial landscape, create budgets and navigate the regulatory environment.

This certificate program is aimed at giving doctors, nurses and other healthcare professionals the basic knowledge and skills needed to manage people and programs efficiently and within the bounds of government regulations.

What You'll Earn

- Healthcare Management Certificate from Cornell Dyson School
- 70 Professional Development Hours (7 CEUs)

Who Should Enroll

- Medical, nursing, and dental professionals
- Physical therapy professionals
- Veterinary professionals
- Pre-med, pre-dental and pre-vet students
- Anyone new to administrative and managerial responsibilities in a medical or dental practice, hospital, or long-term care facility

Total Investment

- 3 months to complete all the courses
